# RESTful Developer Guide

October 10, 2022

### **Important Information**

### **UPS Developer Kit APIs**

Your development of an application using UPS Developer Kit APIs is governed by the UPS Technology Agreement you entered into with UPS. The following are key legal requirements from these agreements for the UPS Developer Kit APIs. For more information on all requirements for the UPS Developer Kit APIs, please refer to the UPS Technology Agreement.

Defined terms used but not defined in this document have the meaning set forth in the UPS Technology Agreement.

### Key Legal Requirements for UPS Developer APIs

#### Permitted Territories

This document can only be used in the countries of the Permitted Territory as defined in the UPS Technology Agreement, as applicable.

#### Use

The application must not be designed to allow distribution of information received through the UPS Developer Kit APIs to third parties, other than to persons having a bona fide interest in such information (e.g., the shipper, receiver, or the third party payer, or to your service providers authorized by UPS).

#### Consent to Use of UPS Mark

- All screens or forms generated by your application including information received through the UPS Developer Kit APIs must include (1) the UPS Mark positioned in reasonable proximity to the Information and of an appropriate size to readily identify the source of the Information as UPS and (2) the following language at the bottom of every screen that displays the UPS Mark: "UPS, the UPS brand mark, and the Color Brown are trademarks of United Parcel Service of America, Inc. All Rights Reserved." Except as set forth in the preceding sentence, you have no right to use the UPS Mark without the prior written approval of UPS.
- You shall not use the UPS Mark in association with any third party trademarks in a manner that might suggest co-branding or otherwise create potential confusion as to source or sponsorship of the application, or ownership of the UPS Mark.
- The UPS Mark shall be used only as provided by UPS electronically or in hard copy form. The UPS Mark may not be altered in any manner, including proportions, colors, elements, etc., or animated, morphed or otherwise distorted in perspective or dimensional appearance.
- The UPS Mark may not be combined with any other symbols, including words, logos, icons, graphics, photos, slogans, numbers, or other design elements. A minimum amount of empty space must surround the UPS Mark separating it from any other object, such as type, photography, borders, edges, etc. The required area of empty space around the UPS Mark must be 1/3x, where x equals the height of the UPS Mark.

#### Copyright and Proprietary Notice

In your application and any POD Letters you prepare, you must include a prominent reproduction of UPS's copyright and proprietary notices in a form and format specified by UPS (See the Copyright section of this document).

#### Display of Information

The application must not display information concerning any other provider of shipping services or such other shipping services on any page, whether comprising one or more frames, displaying information your application receives from the UPS Developer Kit APIs. Your application must present all data within each field received through the UPS Developer Kit APIs without amendment, deletion, or modification of any type.

### **Notice**

In all communications with UPS concerning this document, please refer to the document date located on the cover.

# Copyright

© 2022 United Parcel Service of America, Inc. All Rights Reserved. Confidential and Proprietary

The use, disclosure, reproduction, modification, transfer, or transmittal of this work for any purpose in any form or by any means without the written permission of United Parcel Service is strictly prohibited.

#### **Trademarks**

Some of the UPS corporate applications use United States city, state, and postal code information obtained by United Parcel Service of America, Inc. under a non-exclusive license from the United States Postal Service.

#### **Disclaimer**

UPS Freight Less-than-Truckload ("LTL") transportation services are offered by TFI International Inc., its affiliates or divisions (including without limitation TForce Freight), which are not affiliated with United Parcel Service, Inc. or any of its affiliates, subsidiaries or related entities ("UPS"). UPS assumes no liability in connection with UPS Freight LTL transportation services or any other services offered or provided by TFI International Inc. or its affiliates, divisions, subsidiaries or related entities.

# **Table of Contents**

# **Chapter 1: Introduction**

This document contains implementation instructions for integrating the Rating Package RESTful API into your application, service, or system.

### In this guide, you will find:

- Rate functionality and business rules
- · Header, URL, request and response elements
- Error response code descriptions

#### **Intended Audience**

This guide is intended for developers who will be integrating the Rate API into their application, service, or system.

### Required Knowledge & Skills

This guide assumes you have a basic understanding of the following:

- Concepts and instructions in the Introduction to the UPS Developer Kit guide.
- Web APIs
- · Software development

#### How to Use this Guide

- If this is your first time working with the UPS Developer Kit, begin with the Introduction to the UPS Developer Kit guide. This guide serves as the foundation for all API-specific developer guides.
- · Chapter 3: Customer Integration Environment (CIE) contains information on UPS integration environments.
- Chapter 4: Rate API Elements and Details contains an overview of the containers and elements that comprise the Rate request, Rate response and examples.
- Reference tables and error codes are located in the Appendices.

### **Technical Specifications**

The application creating the return is a Java REST Web Service providing Interface to client applications in Support of Chapter 3: Customer Integration Environment (CIE)

### **Release Features**

#### October 2022

#### Description

New subversion 2205 is being introduced to support the following Rate Request Containers/Elements

#### **Updated Request Containers/Elements**

/ RateRequest/Request/SubVersion

#### **New Response Containers/Elements**

- /RateResponse/RatedShipment/RatedPackage/RateModifier
- /RateResponse/RatedShipment/RatedPackage/RateModifier/ModifierType
- /RateResponse/RatedShipment/RatedPackage/RateModifier/ModifierDesc
- /RateResponse/RatedShipment/RatedPackage/RateModifier/Amount

### New Error Codes - Please refer to the Appendix for error codes

#### **Rate Types Table Update**

• If negotiated rates are requested then the published rate returned will be those associated to the account number, regardless of the Customer Classification requested.

## January 2022

### Description

- Within the Extended Area Surcharge group, Congested is updated to Remote Area.
- Surcharge category of Peak Season Surcharge is updated to Peak/Demand Surcharge, and Subtypes have been updated.

### September 2021

#### **Description**

Beginning January 1, 2022 Delivery Confirmation type 01 will no longer be supported. Any submissions will not fail but the accessorial will not be available.

### International Special Commodities (ISC) enhancements

Two new categories added: E-Cigarettes and Hemp/CBD

New Request Containers/Elements

/Shipment/ShipmentServiceOptions/RestrictedArticles

- ECigarettesIndicator
- HempCBDIndicator

#### **Worldwide Economy Enhancements**

- Responses will now include rates for both Worldwide Economy DDP and DDU services.
- Two new indicators have been added for Worldwide Economy DDU type shipments: oversize accessorial and minimum billable weight. These indicators are only valid with UPS Service type 17 for DDU.

#### New Request Containers/Elements

- Shipment/Package/OversizeIndicator
- Shipment/Package/MinimumBillableWeightIndicator
- Shipment/ShipmentRatingOptions/TPFCNegotiatedRatesIndicator
- Ounces will now be accepted with Subversion 2108 for DDU shipments.

New Error Codes - Please refer to the Appendix for error codes.

# Chapter 2: Understanding the Rating Package RESTful API

The Rating Package RESTul API is used when rating or shopping a shipment. The Rating Package RESTful API for packages allows you to submit two types of rate requests to UPS:

- A rate request to return the rate for a specific UPS service, for example, UPS Next Day Air
- A shop request to return all available services and their rates for a shipment

In this way, you and your customers are able to estimate their shipping costs prior to requesting a specific shipping service or service option.

WARNING: UPS restricts the usage of the Rating API to users who plan to ship packages manifested, tendered, and delivered by UPS. Any customers or developers abusing the API or data mining the API will have their access revoked.

## **Business Process and Rules**

#### General

- UPS expects schema elements/tags as defined in the XPath and presented in the schema structure without spelling or structural deviations. Elements/tags that are not defined in the schema or do not conform to the schema structure will be ignored by UPS.
- Only users that plan to ship packages manifested, tendered, and delivered by UPS can use the Rating Package RESTful API.
- Any customers/developers abusing or data mining the Rating Package RESTful API will have their access revoked.
- To access API documentation the user must have or create a My UPS profile.
- To access testing and production sites the user must have an Access Key. To get an Access Key you must have a My UPS profile and an associated shipping account. For additional information, refer to the UPS Developer Kit User Guide.
- The Rating Package RESTful API provides published and negotiated rates.

# **Negotiated Rates**

The Rating Package RESTful API provides access to Published Rates as well as Negotiated Rates. A negotiated rate is established by contract between the customer and UPS.

If you have a pricing contract with UPS please contact your sales representative for proper setup. Once your UPS sales rep has verified your setup you need to do the following:

- 1. Add your account to your My UPS profile using one of your most recent three invoices.
  - o If you have never generated an invoice or have not generated an invoice in the past 90 days add the account using the pickup location postal code for the account.
  - Since you have not generated an invoice you will need to contact your sales representative a second time to enable negotiated rates in UPS systems.
- 2. When transacting with UPS API servers include the correct My UPS ID/PW + Account + Access Key.
- 3. Include the 'Negotiated Rates Indicator' element within your request. The element is an empty tag.

#### **IMPORTANT NOTES:**

- Negotiated rates in the CIE are for test purposes only and are not representative of actual negotiated rates. A 1% discount is applied when requested.
- Post-shipment charges, such as address corrections, dimensional weight adjustments, and other adjustments will affect the actual rate billed which may differ from the rates returned by the Rating Package RESTful
- API.

- Make sure that all requests are identical when comparing shipping charges between applications and APIs that provide UPS Negotiated Rates.
- Working through discrepancies requires knowledge of all parameters posted, defaults, numeric rounding, and the rate table used by the applications being compared.

You can check your results against the UPS Calculate Time and Cost program: https://wwwapps.ups.com/ctc

# **Rate Types Table**

The following table displays the Rate Chart that is returned by the Rating Package RESTful API based on the combination of Customer Classification code, Pickup Type code, and Account Number.

| Customer Classification | Pickup type           | Account Number                                        | Rate Returned *                                       |
|-------------------------|-----------------------|-------------------------------------------------------|-------------------------------------------------------|
| 00                      | Valid/Missing/Invalid | Valid                                                 | Rate associated with account number                   |
| 00                      | Valid/Missing/Invalid | Missing/Invalid                                       | Retail Rates                                          |
| 01                      | Valid/Missing/Invalid | Valid/Missing/Invalid                                 | Daily Rates                                           |
| 04                      | Valid/Missing/Invalid | Valid/Missing/Invalid                                 | Retail Rates                                          |
| 06                      | Valid /Invalid        | Valid/Missing/Invalid                                 | General List Rates                                    |
| 07                      | Valid /Invalid        | Valid/Missing/Invalid                                 | Alternative Zoning                                    |
| 08                      | Valid /Invalid        | Valid/Missing/Invalid                                 | General List Rates II                                 |
| 09                      | Valid /Invalid        | Valid/Missing/Invalid                                 | SMB Loyalty                                           |
| 10                      | Valid /Invalid        | Valid/Missing/Invalid                                 | All Inclusive                                         |
| 11                      | Valid /Invalid        | Valid/Missing/Invalid                                 | Value Bundle I                                        |
| 53                      | Valid/Missing/Invalid | Valid/Missing/Invalid                                 | Standard List Rates                                   |
| Missing/Invalid         | 01                    | Valid/Missing/Invalid                                 | Rate Type based on the shipper's country or territory |
| Missing/Invalid         | 03/06/07/19/20        | Valid/Missing/Invalid                                 | Rate Type based on<br>Retail Rates                    |
| Missing/Invalid         | Missing/Invalid       | Valid                                                 | Rate associated with account number                   |
| Missing/Invalid         | Missing/Invalid       | Container provided but account number Invalid/Missing | Rate Type based on the shipper's country or territory |
| Missing/Invalid         | Missing/Invalid       | Not Provided                                          | Rate Type based on the shipper's country or territory |

<sup>\*</sup> If negotiated rates are requested then the published rate returned will be those associated to the account number, regardless of the Customer Classification requested.

### **User Level Promotion Business Processes and Rules**

User level promotion is for the customers who do not have a UPS shipper account. The following conditions need to be met to use user level promotions: UserLevelDiscountIndicator in request, do not pass shipper number, Username should be present and user should be eligible for a user level promotion.

If User level promotion is requested with a UPS shipper account (Shipper/ShipperNumber), User level promotion will not be requested for a given shipment.

# **Saturday Delivery**

UPS offers Saturday Delivery options, for an additional charge, for many service levels. When requesting Time In Transit information with the Rating Package RESTful API, services that are eligible for Saturday Delivery may be returned. Services that are available for Saturday Delivery will have an Estimated Delivery day of week (/Rated Shipment/TimeIn Transit/ServiceSummary/Estimated Arrival/DayOfWeek) of "SAT" (Saturday). In addition, if there is a charge for the service, there will be a Saturday Delivery indicator with a value of "1" (/Rated Shipment/TimeIn Transit/ServiceSummary/SaturdayDelivery) along with a disclaimer that the service is available for an additional charge (/Rated Shipment/TimeIn Transit/ServiceSummary/SaturdayDeliveryDisclaimer).

Saturday Delivery is available in select cities for the non-premium services of UPS Three Day Select and UPS Ground. There is no additional charge for eligible residential destinations but a fee will apply for eligible commercial destinations. To return 'Saturday Delivery' in the response you must send a 'Ratetimein transit' or 'Shoptimein transit' request. For commercial destinations you may send a 'Shoptimein transit' without the 'Saturday Delivery' element. For Ratetimein transit requests shipping to commercial addresses to return a service level resulting in a Saturday Delivery, please add the 'Saturday Delivery Indicator' to the request.

# **UPS Simple Rate Business Processes and Rules**

UPS Simple Rate enables shippers to use their own packaging to ship anywhere in the U.S. for a flat rate. UPS Simple Rate offers five different rate options based on package size and is available for UPS Ground, UPS 2nd Day Air, UPS 3 Day Select and Next Day Air Saver services. It includes guaranteed delivery complete with UPS tracking and visibility.

UPS Simple Rate rates are exempt from residential, delivery area extended, delivery area, and fuel surcharge fees. All other surcharges and value added accessorials apply.

- The following information describes business rules for UPS Simple Rate:
  - Must not contain dangerous goods
  - Shipment is prepaid
  - Not valid for freight collect or third party shipments
  - Only valid for a single piece shipment
  - Up to 50 lbs.
- · Simple Rate Box Descriptions:
  - XS (Extra Small )
    - o Size Range: 1 to 100 cu in<sup>3</sup>
  - S (Small)
    - Size Range: 101 to 250 cu in<sup>3</sup>
  - M (Medium)
    - o Size Range: 251 to 650 cu in<sup>3</sup>
  - L (Large)
    - o Size Range: 651 to 1050 cu in<sup>3</sup>
  - XL (Extra Large)
    - Size Range: 1051 to 1728 cu in<sup>3</sup>
- Simple Rate is available within the U.S. 50 States
- Only Valid for the following services (code):
  - UPS Ground (03)
  - UPS 3 Day Select (12)
  - UPS 2nd Day Air (02)

• UPS Next Day Air Saver (13)

# Chapter 3: Customer Integration Environment (CIE)

The Customer Integration Environment allows customers to test their application prior to launch. This environment is intended for integration testing of customer applications with the UPS servers.

Once your application has been thoroughly tested, you should redirect the application to the UPS Production Environment.

No stress testing should ever be performed by customers against any UPS systems.

To access testing and production sites the user must have an Access Key. You can request an Access Key after establishing a UPS profile and associating your shipping account.

Test your Rate and Service selections using valid and invalid data elements including postal codes, weights, and package types. This will ensure that your application has the ability to process success and error responses correctly.

### System Availability

The Customer Integration Environment is available 24 hours a day, 7 days a week. Note, the system is occasionally down for server maintenance.

All API URLs are case sensitive.

# **Using Negotiated Rates in CIE**

Negotiated rates are available in the UPS Customer Integration Environment (CIE) and are returned when the Negotiated Rate indicator is provided in the rate request.

- The negotiated rates returned do not reflect the contractual rate and may vary. Typically, they are 1% off the published rate.
- Also in the Customer Integration Environment, the shipper eligibility for negotiated rates is not fully verified.
- Negotiated Itemized Charges for UPS Worldwide Express Freight are not returned in CIE.
- 1% of tax charges and total charges with taxes are returned as negotiated rates in CIE mode if the TaxInformationIndicator is present in the request and if taxes are applicable.

## **User Level and Transactional Promotions in CIE**

Discounted rates are available in the UPS Customer Integration Environment (CIE) and are returned when either the transactional promotion is valid or the User Level Discount Indicator is provided in the rate request.

- The negotiated rates returned do not reflect the contractual rate and may vary. Typically, they are 1% off the published rate.
- For Transactional Promotions, the promotion code is not validated. There is also no check as to whether or not the applied promotion is valid for the service or shipping lane in the request.
- For User Level Promotions, the UserID is still validated to see if a valid promotion is tied to it. However, there is no check as to whether or not the applied promotion is valid for the service or shipping lane in the request

# Integration Testing and Production URLs

| Testing:    | https://www.cie.ups.com/ship/{version}/rating/{requestoption}     |
|-------------|-------------------------------------------------------------------|
| Production: | https://onlinetools.ups.com/ship/{version}/rating/{requestoption} |
|             |                                                                   |

Note that valid value of requestoption is Rate, Shop

Valid ersion values are v1, v1601, v1607, v1701, v1707, v1801

# Chapter 4: Rating Package RESTful API Elements and Details

The following constraints applies to all APIs referenced in this developer guide.

UPS expects elements as defined in the path and presented in the structure i.e., no spelling or structural deviations. Elements that are not defined or do not conform to the structure will be ignored by UPS.

Element constraints are defined as follows:

#### Name

The element or container name.

#### **Constraints**

#### Required

- Yes indicates the element must be present in the request or response.
- Yes\* indicates the element must be present in the request if the parent container is present in the request.
- No indicates the element is optional and may be used if it applies to the request.
- Cond indicates the element is required under certain conditions.

### **Type**

- Container holds a group of related elements.
- String consists of alphanumeric characters, spaces, and decimals.
- Array collection of values that allows to provide a list of values. An array begins with [(left bracket) and ends with] (right bracket). Its values are separated by, (comma).
- Header header parameter
- Path URL path parameter
- Query URL query parameter

#### Length

• The maximum number of characters that can be present in a String. Length is not applicable (N/A) to Containers.

#### **Max Allowed**

• The maximum number of elements or containers that can be present in the parent container.

#### **Description**

A description of the element or container. Also any validation rules associated with the element/container.

# Header

| Name                 | Constraint                                   | Description                                                                                                                 |
|----------------------|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| transId              | Required: Yes<br>Type: Header<br>Length: 32  | An identifier unique to the request.                                                                                        |
| transactionSrc       | Required: Yes<br>Type: Header<br>Length: 512 | Identifies the client/source application that is calling                                                                    |
| AccessLicenseNumber  | Required: Yes<br>Type: Header<br>Length: 16  | Authorization: Access Key obtained through on-boarding process. Contact your UPS representative for additional information. |
| Username             | Required: Yes<br>Type: Header<br>Length: 16  | The customers MyUPS username                                                                                                |
| Password             | Required: Yes<br>Type: Header<br>Length: 26  | The customers MyUPS password                                                                                                |
| Authentication Token | Required: No<br>Type: Header                 | Used to authorize the access to API. Can be used in place of Username and Password                                          |
| Authorization        | Required: No<br>Type: Header                 | Used to authorize the access to API. Can be used in place of Username and Password                                          |

# **URL**

 $https://onlinetools.ups.com/ship/\{version\}/rating/\{requestoption\}? additional info=time intransited for the context of the c$ 

# **URL Parameters**

| Name          | Constrint                                 | Description                                                                                                                                                                                                                                                                                                               |
|---------------|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| version       | Required: Yes<br>Type: Path<br>Length: 5  | Indicates Rate API to display the new release features in Rate API response based on Rate release. See the New section for the latest Rate release. Supported values: v1, v1601, v1607, v1701, 1801, 2205                                                                                                                 |
| requestoption | Required: Yes<br>Type: Path<br>Length: 10 | Valid Values:  Rate = The server rates (The default Request option is Rate if a Request Option is not provided).  Shop = The server validates the shipment, and returns rates for all UPS products from the ShipFrom to the ShipTo addresses.  Rate is the only valid request option for Ground Freight Pricing requests. |

# **Query Parameters**

| Name           | Constrint                                  | Description                                                                                                                                                                    |
|----------------|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                |                                            | Valid Values:                                                                                                                                                                  |
| additionalinfo | Required: Yes<br>Type: Query<br>Length: 15 | timeintransit = The server rates with transit time information combined with requestoption in URL.  Rate is the only valid request option for Ground Freight Pricing requests. |

| CommercialInvoiceRemovall ndicator | Required: No<br>Type: String<br>Max Allowed: 1<br>Length: 0      | Presence/Absence Indicator. Any value inside is ignored. CommercialInvoiceRemovalIndicator - empty tag means indicator is present. CommercialInvoiceRemovalIndicator allows a shipper to dictate that UPS remove the Commercial Invoice from the user's shipment before the shipment is delivered to the ultimate consignee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## **Error Codes**

When the UPS system is unable to respond to a request, be it from a malformed request, an illegal or invalid value, or other issues, the API generates an error response.

#### **HTTP Status Codes**

| Code | Message                           | Description                                                                                                                                                                            |
|------|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 200  | ОК                                | Success: Everything is working                                                                                                                                                         |
| 400  | Bad Request                       | The request was invalid or cannot be served. The exact error should be explained in the error payload. E.g. The request is not valid "                                                 |
| 401  | Unauthorized                      | The request requires authentication                                                                                                                                                    |
| 404  | Not found                         | URL does not exist or resource not found                                                                                                                                               |
| 405  | Method not allowed                | Method not allowed                                                                                                                                                                     |
| 500  | An internal server error occurred | An internal server error occurred; API developers should avoid this error. If an error occurs in the global catch blog, the stracktrace should be logged and not returned as response. |
| 503  | Internal Server Error             | The service/resource is not available. There are external component DOWN issues that the client will not be able to resolve                                                            |

#### **Common Error Codes**

The following error codes can apply:

| Code   | HTTP Status | Description                                                                       |
|--------|-------------|-----------------------------------------------------------------------------------|
| 10013  | 400         | The message is too large to be processed by the Application.                      |
| 20001  | 500         | General process failure.                                                          |

## **Country or Territory Codes**

#### **Rating Package API Supported Countries or Territories**

UPS country or territory code abbreviations generally follow the recommendations of the International Standards Organization (ISO), which publishes a list of country or territory abbreviations in ISO Standard 3166.

The following table lists the country or territory codes defined by ISO at the time of this publication. The latest information is available from the ISO web site: http://www.iso.org/.

NOTE: Not all UPS services are available in every country or territory. Refer to the UPS Rate and Service Guide at UPS.com for more information on UPS services.

| Destination Country or Territory<br>Name | Country or<br>Territory Code | Supported<br>Forward Origin | Supported<br>Return Origin |

## **Currency Codes**

UPS currency code abbreviations generally follow the recommendations of the International Standards Organization (ISO), which publishes a list of currency abbreviations in ISO Standard 4217. The following table lists the currency codes defined by ISO at the time of this publication. The latest information is available from the ISO web site: http://www.iso.org/.

Countries or Territories may sometimes change their official currency. UPS does require time after the introduction of a new currency before it can fully support that currency. In addition, UPS may continue to support the older currency for an interim period in order to provide backwards compatibility.

UPS may also require the use of currencies other than the official currency for some countries or territories.

| Country or Territory or Region | Currency Name         | Currency Code |
|--------------------------------|-----------------------|---------------|
| Afghanistan                    | Afghani               | AFN           |
| Albania                        | Lek                   | ALL           |
| Algeria                        | Algerian Dinar        | DZD           |
| American Samoa                 | US Dollar             | USD           |
| Andorra                        | Euro                  | EUR           |
| Angola                         | Kwanza                | AOA           |
| Anguilla                       | East Caribbean Dollar | XCD           |
| Antigua And Barbuda            | East Caribbean Dollar | XCD           |
| Argentina                      | Argentine Peso        | ARS           |
| Armenia                        | Armenian Dram         | AMD           |
| Aruba                          | Aruban Guilder        | AWG           |
| Australia                      | Australian Dollar     | AUD           |
| Austria                        | Euro                  | EUR           |
| Azerbaijan                     | Azerbaijanian Manat   | AZN           |
| Bahamas                        | Bahamian Dollar       | BSD           |
| Bahrain                        | Bahraini Dinar        | BHD           |
| Bangladesh                     | Taka                  | BDT           |
| Barbados                       | Barbados Dollar       | BBD           |
| Belarus                        | Belarussian Ruble     | BYR           |
| Belgium                        | Euro                  | EUR           |
| Belize                         | Belize Dollar         | BZD           |
| Benin                          | CFA Franc BCEAO       | XOF           |
| Bermuda                        | Bermudian Dollar      | BMD           |
| Bhutan                         | Indian Rupee          | INR           |
| Bhutan                         | Ngultrum              | BTN           |
| Bolivia                        | Boliviano             | вов           |
| Bolivia                        | Mvdol                 | BOV           |

| Country or Territory or Region    | Currency Name         | Currency Code |

## **Delivery Confirmation Origin-Destination Pairs**

The Origin-Destination table defines valid origin and destination combinations for the delivery confirmation accessorials. These accessorials may be applied at the package-level (P) or at the shipment-level (S). They are valid for forward shipments only.

Delivery confirmation types are as follows:

- Delivery confirmation with signature required (DC-SR)
- Delivery confirmation with adult signature required (DC-ASR)

| Origin                                                                           | Destination                                       | DC-SR | DC-ASR |
|----------------------------------------------------------------------------------|---------------------------------------------------|-------|--------|
| US50                                                                             | US50, PR                                          | Р     | Р      |
|                                                                                  | CA, VI                                            | S     | S      |
|                                                                                  | Intl other than CA, PR, VI                        | S     | S      |
| Canada (CA)                                                                      | US50, PR, VI                                      | S     | S      |
|                                                                                  | CA                                                | Р     | Р      |
|                                                                                  | Intl other than US50, PR, VI                      | S     | S      |
| Puerto Rico (PR)                                                                 | US50, PR                                          | Р     | Р      |
|                                                                                  | CA, VI                                            | S     | S      |

# Rating Package RESTful API FAQs

NOTE: Common FAQS are available in the Introduction to the UPS Developer Kit guide located in the Dev Kit.

| Category                        | Question                                                                                               | Answer                                                                                                                                                                                                                                                                                   |  |  |
|---------------------------------|--------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| 3rd Party Billing               | Does the Rating Package<br>API support 3rd Party billing<br>requests?                                  | No, it does not support 3rd Party Billing.                                                                                                                                                                                                                                               |  |  |
| Account Number<br>Limitation    | How do I associate more<br>than 99 account numbers<br>with the Shipping/Rating<br>APIs?                | Contact your UPS Account Representative for assistance.                                                                                                                                                                                                                                  |  |  |
| Accessorials                    | What accessorials does the Rating API support?                                                         | Refer to the XPath section for a listing of supported accessorials.                                                                                                                                                                                                                      |  |  |
| ChemicalRecordIdentifie r       | What is a<br>ChemicalRecordIdentifier                                                                  | Chemical Record Identifier is the chemicals in the shipment. If there are 3 chemicals then they need to be numbered in that field with 1, 2, 3 as values in the container.                                                                                                               |  |  |
| Choosing a service              | Can a customer compare services for a shipment using the Rating API?                                   | Yes. Use the "Shop" value, instead of the "Rate" value, in the RequestOption element of the/Request container to retrieve the rates for all services for the stated lane pair. The API response will return a rate for each of the available services. This is known as the Shop option. |  |  |
|                                 |                                                                                                        | The Rate option is used to request the rate for a specific UPS service. The service must be defined in the request. The API response will return the rate for the defined lane pairs for that UPS service.                                                                               |  |  |
|                                 |                                                                                                        | If a service is not valid for the defined lane pair, an error response will be returned.                                                                                                                                                                                                 |  |  |
| Currencies                      | Does the Rating API return<br>any currency other than<br>USD? If so, what currencies<br>are supported? | Yes. A list of currencies and currency codes are available in the appendix of this guide. The currency returned in the response is based on the shipper's country or territory of origin.                                                                                                |  |  |
| Customer Classification<br>Code | Are the rates that a customer gets via the Rating Package                                              | The rate returned is determined by the Customer Classification Code selected in API.                                                                                                                                                                                                     |  |  |
|                                 | API the same as the rates<br>they receive at The UPS<br>Store® locations or UPS<br>Customer Centers?   | Refer to the Rate Types Table and XPath for additional information.                                                                                                                                                                                                                      |  |  |
| Delivery Area Surcharge         | Does the Rating Package<br>API support Delivery Area<br>Surcharge?                                     | Yes. However, it is included within the total transportation charge in the rate response.                                                                                                                                                                                                |  |  |
| Extended Area<br>Surcharge      | Is Extended Area Surcharge included within the rating                                                  | Yes. The Extended Area Surcharge (EAS) is returned with the transportation charges.                                                                                                                                                                                                      |  |  |
|                                 | response?                                                                                              | If EAS is applied to a shipment, a warning will be returned in the XML response stating that an EAS has been added.                                                                                                                                                                      |  |  |
| Freight LTL/Air Freight         | Does Rating Package API<br>support Freight LTL or UPS<br>Air Freight services?                         | No.                                                                                                                                                                                                                                                                                      |  |  |
| Fuel Surcharge                  | Does the Rating Package<br>API include fuel surcharge?                                                 | Yes, however it is not broken out separately, it is returned with other charges.                                                                                                                                                                                                         |  |  |

| Category                                            | Question                                                                                                | Answer                                                                                                                                                                                                                                                                                                                            |  |  |
|-----------------------------------------------------|---------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| Ground Freight Pricing                              | Does Rating API support<br>Ground Freight Pricing<br>(GFP)?                                             | ONLY the Rating Package Web Service version supports Ground Freight Pricing.                                                                                                                                                                                                                                                      |  |  |
| Hundredweight (CWT)                                 | Does Rating API support<br>UPS Hundredweight®<br>Service contracts?                                     | ABR contract rates are based on the tier associated with the UPS account number.      The UPS Account number must be included in the rate request.      The 'Negotiated Rates Indicator' must be sent in the rate request."      UPS Hundredweight® published rates are no longer available via the Rate API, only contract rates |  |  |
| International Extended<br>Area Surcharge            | Does the Rating Package<br>API support international<br>extended area surcharges?                       | Yes.                                                                                                                                                                                                                                                                                                                              |  |  |
| International Rates                                 | Does the Rating Package<br>API support international<br>rates?                                          | Yes. Requests are validated if the shipper number is from the origin country or territory.                                                                                                                                                                                                                                        |  |  |
| Lightly Regulated (LR)                              | What is Lightly Regulated (LR)                                                                          | Lightly Regulated is referencing Lithium Ion batteries versus some other regulated materials.                                                                                                                                                                                                                                     |  |  |
| Maximum Packages<br>Rated                           | What is the maximum<br>number of packages that can<br>be rated through the Rating<br>Package API?       | When using the Rate option, there is a 200-package maximum allowed for each API request. Each package container in the request can contain 1 package.  When using the Shop option, there is a 50-package maximum limit allowed for each API request.                                                                              |  |  |
| N/A                                                 | Whatis N/A?                                                                                             | Not Applicable                                                                                                                                                                                                                                                                                                                    |  |  |
| Negotiated Rates                                    | Can a customer with a US account number rate a package being shipped from another country or territory? | Yes. However, the response will not return any negotiated or account-based rates. Negotiated and account-based rates require the shipper's country or territory and the shipment country or territory of origin to be the same.                                                                                                   |  |  |
|                                                     |                                                                                                         | If you require negotiated or account-based rates from a country or territory outside the US, consider setting up ar account in the non-US country or territory.                                                                                                                                                                   |  |  |
| Negotiated Rates                                    | How do I get negotiated rates?                                                                          | Contact your Account Representative.                                                                                                                                                                                                                                                                                              |  |  |
| Negotiated Rates/ABR                                | Does Rating API support<br>Account Based Rating<br>(ABR)?                                               | Yes.                                                                                                                                                                                                                                                                                                                              |  |  |
| Negotiated Rates or<br>Account Based Rates<br>(ABR) | Is there a delay in activating<br>a new or modified account in<br>ABR for Rating or Shipping<br>APIs?   | The availability of negotiated rates is dependent on the setup of your account.  If you have a pricing contract with UPS, please contact your sales representative for proper setup. For additional information, refer to Using Negotiated Rates in CIE.                                                                          |  |  |

| Category                                       | Question                                                                                                                               | Answer                                                                                                                                                                                                                           |

|                                                |                                                                                                                                        | <b>Note</b> : Import rates are not available for Inbound shipments that were shipped using Freight Collect billing.                                                                                                              |
| Published & Negotiated<br>Rates (ABR) Response | Can the Rating API provide<br>both published and<br>negotiated rates, assuming<br>ABR has been activated,<br>within the same response? | Yes.                                                                                                                                                                                                                             |
| Rate versus Shop                               | What is the difference between a "Rate" request and a "Shop" request?                                                                  | A "Rate" request returns the rate for a single service for each package, while a "Shop" request returns the rates for all services available between a given origin/destination pair for each package.                           |
| Rating for Web applications                    | Are rates across all UPS<br>Web applications always the<br>same?                                                                       | Yes. The rates for other Web applications should not differ from the Rating API. The only time rates would be different is if there is a defect within the applications.                                                         |
|                                                |                                                                                                                                        | If a user questions rates returned by the Rating API, he could generate the exact rate request on Calculate Time and Cost on UPS.com, to confirm if rates are accurate.                                                          |
|                                                |                                                                                                                                        | Rates will differ if the user has negotiated rates set up with their account number and is not sending a negotiated rates indicator via the Rating API or does not have negotiated rates approved to be used with the Rating API |
| Rating Scheduled Time                          | Does the Rating API return the time of day in its response?                                                                            | Yes.                                                                                                                                                                                                                             |

| Category                            | Question                                                                                                                   | Answer                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Residential versus<br>Commercial    | Does Rating API<br>automatically validate                                                                                  | UPS only classifies residential and commercial address classification for U.S. and Canada.                                                                                                                                                                                                                               |
|                                     | Residential verses<br>Commercial addresses?                                                                                | If the residential indicator is included in the rate request, then the shipment will be classified as residential. Upon processing, if the address is classified by UPS differently that what is provided in the request then a warning will be provided in the response indicating that the classification was changed. |
| Return Services                     | Does the Rating API support Return Services?                                                                               | Yes.                                                                                                                                                                                                                                                                                                                     |
| Saturday Delivery                   | Will the Rating API -<br>Package allow a customer to<br>know if Saturday delivery is<br>available?                         | Since Saturday delivery is an accessorial, an indication must be included in the Rating API request. If it is available then the response will specify that the delivery will be on Saturday. The Rating API does not specify guaranteed delivery times                                                                  |
| Shipping/Labeling                   | Can you ship and/or print labels via the Rating Package API?                                                               | No.                                                                                                                                                                                                                                                                                                                      |
| Suppression of Service<br>Types     | Why does Rating API, Time in Transit API and Calculate Time and Cost on UPS.com provide different results?                 | The Time in Transit API uses logic in its calculations and will suppress services that are more expensive if they will not deliver the shipment any quicker than those shown in the Rating API.                                                                                                                          |
|                                     |                                                                                                                            | There is a rule that states if ground service is as fast as or faster than an air service, i.e., UPS 2nd Day Air®, then that air service will be suppressed in the Time in Transit API response.                                                                                                                         |
|                                     |                                                                                                                            | While the unlisted service is still a valid shipping option, the customer could save money choosing from the listed services.                                                                                                                                                                                            |
| Testing and Production environments | Are separate test IDs necessary to access the test verses production environment?                                          | No.                                                                                                                                                                                                                                                                                                                      |
| Time in Transit                     | Does the Rating API support Time in Transit results?                                                                       | No. Time in Transit information can be obtained from the Time in Transit API.                                                                                                                                                                                                                                            |
| Time in Transit                     | Why am I getting an "11542 -<br>Invalid Destination" error in<br>my "Ratetimeintransit" or<br>"Shoptimeintransit" request? | One possibility is that if the "PostalCode" is assigned to multiple cities then the "ShipTo" city must be provided.                                                                                                                                                                                                      |
| UNB                                 | What is UNB?                                                                                                               | Unbounded: Having no limits.                                                                                                                                                                                                                                                                                             |
|                                     |                                                                                                                            |                                                                                                                                                                                                                                                                                                                          |
